

Standard Operating Procedure: Station Housekeeping

SOP-OPS-HK-03 · Revision 2 · Operations Department

1. Scope

This procedure sets the cleanliness standard for concourse, platform, lifts, escalators and washrooms at all stations. It applies to station staff and the housekeeping contractor.

2. Daily routine

Area	Frequency	Standard
Platforms and concourse	Every 2 hours	No visible litter; floors dry
Washrooms	Every hour	Checklist signed on the door
Lifts and escalator handrails	Every 3 hours	Disinfected; logged

3. Materials

Use only approved, non-slip floor cleaners. Wet floors must be marked with yellow caution boards until dry.

4. Inspection

The Station Controller inspects each area once per shift and records defects in the station log. Repeated lapses are reported to the Operations manager in the weekly review.

5. Waste handling

Segregate dry, wet and hazardous waste. Hazardous waste, including batteries and fluorescent tubes, is stored in the marked bin for collection by the authorised vendor.
